

Declaration of Conformity regarding Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)

Subject	Declaration of Conformity regarding Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)
Products	Strech Film for Industrial use (310,308,388,333,555,888,777,111,112, 999)
	Paper and cardboard core
	Corrugated cardboard packaging
	Paper edge protector
	Self-adhesive labels
	Self-adhesive tapes

Type of declaration: Technical information provided in support of PPWR Regulation. (EU) 2025/40

MÜROLL KFT hereby confirms that the packaging products placed on the market by our company, together with the packaging components used therein, have been assessed against the currently applicable and verifiable requirements of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR).

I. Substance Restrictions

The packaging materials supplied by MÜROLL KFT comply with the currently applicable PPWR requirements regarding substance restrictions, including:

- a. HEAVY METALS (Article 5 (4))
The total content of heavy metals (Pb, Hg, Cd and Cr(VI)) do not exceed 100 ppm.
- b. ANIMAL SUBSTANCES: Substances derived from animals are not directly used in production.
- c. CMR: carcinogenic, mutagenic, or toxic to reproduction (CMR) substances or substances having endocrine-disrupting (ED) properties are not present in concentration above 0,1% .
- d. ENERGY RECOVERY : The material can be recoverable in the form of energy recovery and comply with EN 13431.
- e. GMO: substances derived from Genetically Modified Organisms are not directly used in production .
- f. MOSH/MOAH: MOSH (Mineral Oil Saturated Hydrocarbons), MOAH (Mineral Oil Aromatic Hydrocarbons < 1%) are not directly used in production .
- g. NANOPARTICLES: Nanoparticles are not directly used in production.
- h. PHTALATES: Phtalates are not directly used in production.

- i. PFAS : PFAS – Article 5(5) of Regulation (EU) 2025/40 establishes PFAS restrictions exclusively for packaging placed on the market for direct food contact. The stretch films covered by this document are industrial packaging products intended for use as secondary and/or tertiary packaging across a wide range of industries, including the food sector. As they are not intended to come into direct contact with food, they do not fall within the scope of Article 5(5) of the Regulation. For information purposes only, voluntary PFAS testing has been performed as part of HIPAC's internal technical documentation. No targeted PFAS were detected above the applicable analytical limits. This assessment is supported by voluntary analytical testing and supporting supplier information.

The above assessment is based on information available at the date of issue, current analytical methods and information provided through the supply chain. Certain delegated and implementing acts under Regulation (EU) 2025/40 remain pending and may provide further clarification regarding the assessment and documentation of compliance.

As the PPWR provides for phased implementation, many of its requirements will become applicable only from 12 August 2026 onwards. Accordingly, this declaration is limited to those requirements that are currently in force and capable of being assessed at the date of issue.

II. Minimisation of Substances of Concern

Packaging has been designed and manufactured to minimise substances of concern, as required by the PPWR, to the extent technically feasible.

III. Traceability

Appropriate measures are in place to ensure manufacturer identification as well as batch and product traceability throughout the supply chain.

This declaration relates exclusively to the PPWR requirements that are applicable and assessable at the date of issue. It should not be interpreted as confirmation of full compliance with future PPWR obligations that will enter into force during the Regulation's transitional implementation period.

Yours sincerely,

Thomas K. Berchtold
